

Show pricing using dynamic “Mode” setting:

Look on the menu bar next to View Cart:

Mode: On = Show prices

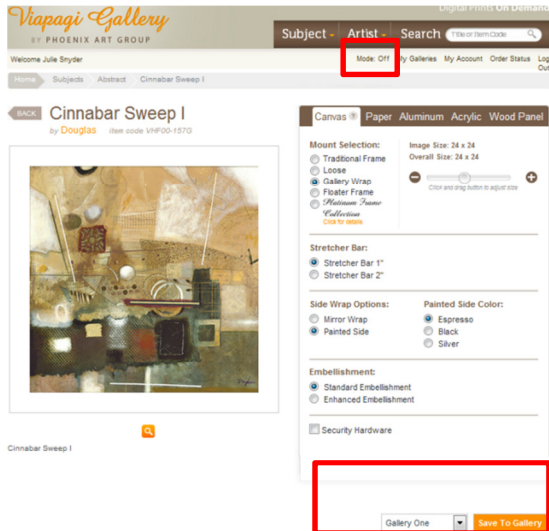

Mode: Off = Prices hidden

For most customers and sales reps, this mode is dynamic and can be changed on-the-fly (toggle on/off) – **just click on “Mode” to change**

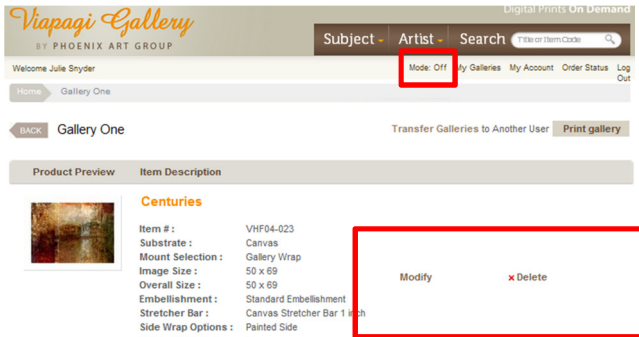

Mode: Off hides pricing:

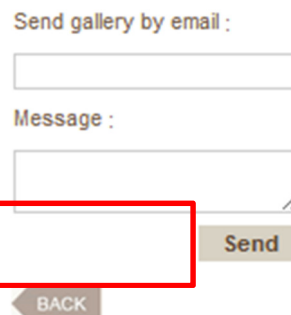

...in configuration window

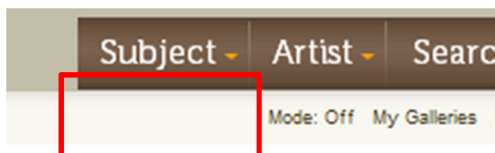

...in galleries

...email galleries (hidden show price checkbox)

And shopping cart/checkout is disabled (hidden):

For users (Patrons) without pricing permissions, pricing is hidden also in the trade gallery. The Viapagi logo to activate slider is also removed for these users.
